

SPRAY PAINTING POLICY

NOTE: It is the aim of CYCSA management to minimize all forms of spray painting on site. Contractors and members are requested and encouraged to apply paint by brush or roller. No member or contractor shall undertake spray painting within the confines of the Club without the permission of the Executive Officer (or his/ her appointed representative) or the Property Manager.

Regulations covering types of paints, spray equipment are set out below:-

- a) Spray painting may only be carried out on the Slipway apron and approaches to the launching ramp
- b) Spray painting may only be carried out when the wind is from the south or southwest at no more than 5 knots
- c) Except for minor touch up work only anti-fouling paint may be sprayed
- d) Except for minor touch up work only airless spray equipment may be used
- e) Any person spray painting shall create an exclusion zone 6 metres from the vessel being sprayed using signed bollards provided by CYCSA. The exclusion zone must be clean prior to spray painting and all non-essential hazardous materials must be removed. There is to be no smoking in this area and a person within the exclusion zone must not light or introduce any source of ignition, or start or set in motion the engine of any plant.
- f) All personnel working inside the exclusion zone shall wear appropriate respirators. Full face and half face respirators that rely on facial fit are not acceptable if the operator has facial hair. Operators who have facial hair shall use either powered air purifying respirators (PAPR) or air supply type respirators in accordance with OHS&W Regulations 1995 Personal Protection 2.12.2 Use of Air Supplied Respiratory Equipment and AS/NZ 1716
- g) No spray painting shall take place at weekends/public holidays or on special Club activity days
- h) The Executive Officer (or his/ her appointed representative) or the Property Manager may instruct that spray painting cease at any time.
