

## FEATURES & ENHANCEMENTS UPDATE January 2025

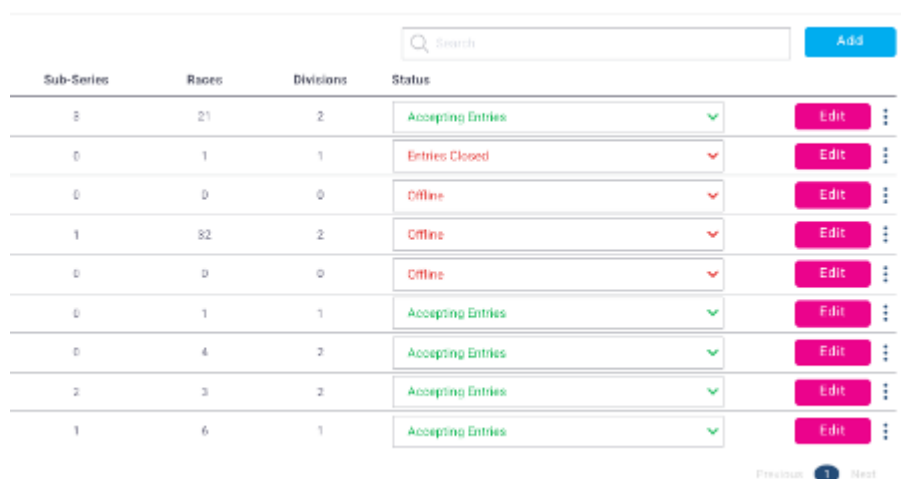

Hi Greg, it is with great pleasure that we announce further and continued development of the world's most advanced yacht race management system.

You may have noticed a few new buttons and options over the weekend. We've now put the finishing touches on these new features and enhancements, which are outlined below.

We hope you find them helpful!

### Bulk series status amendments

Clubs can now change the status of a series more easily and quickly, streamlining routine series management.

The screenshot shows a table with columns for Sub-Series, Races, Divisions, and Status. A search bar and an 'Add' button are at the top right. The table contains 10 rows of series data, each with an 'Edit' button and a dropdown menu for status changes.

Sub-Series	Races	Divisions	Status	
5	21	2	Accepting Entries	Edit
0	1	1	Entries Closed	Edit
0	0	0	Offline	Edit
1	82	2	Offline	Edit
0	0	0	Offline	Edit
0	1	1	Accepting Entries	Edit
0	4	2	Accepting Entries	Edit
2	3	2	Accepting Entries	Edit
1	6	1	Accepting Entries	Edit

### Regatta enhancements

We have introduced a new feature to enhance the club's regatta offerings. Located in the series setup, clubs can now display:

- Entrants before they are processed
- Country flags—definable on the boat's profile page by either the club or the boat administrator(s)
- Display bow number—definable on the boat's profile page by either the club or the boat administrator(s)
- Display the boat's make and model. We are still refining this due to limited space on the results pages and the fact that most users view results on a mobile device.

All Divisions Overall

Handicap type: Scratch Subseries: None

Country	Bow Number	Sail No.	Name	Make & Model	Skipper	Club	Status
Overall Start: 06:00							
AUS	007	123456789	About Time	Cookson 12	Brad McMaster	BEEC	🟢
AUS	001	987	Another new boat	Outremer 51	Brad McMaster	CYCA	🟡

- Clubs can now also showcase an enhanced sponsor logo on the main results page series.

### Enhanced race page navigation

We've added navigation buttons at the bottom of the race management page, enabling clubs to quickly and easily navigate sequentially through races in a series. This feature is especially useful when multiple races are scheduled for the same day.

### Continued enhancement to the copying entrants & results feature

Alongside other improvements made to the functionality of copying entrants and results, we've included the option to select boats for copying by division.

### Copy Race Results

Copy results from another race you have access to. You will only see races that are on the same date as this race and have been processed.

### Entry list changes

To help clubs review entries and better identify the types of entries, we have improved the display to more clearly differentiate between Casual, Subseries, and Series (Block) entries. We've also included the make and model in this view.

<input type="checkbox"/> Boat & Skipper ▾	<input type="checkbox"/> Model ▾	<input type="checkbox"/> Div ▾	<input type="checkbox"/> Spinnaker ▾	<input type="checkbox"/> Entry ▾	<input type="checkbox"/> Payment	<input type="checkbox"/> Progress ▾

### Pursuit Start Times

To tackle the challenges clubs face if pursuit start times are not recalculated after accepting a late entry, we have implemented two levels of protection against this increasingly common error.

Firstly, an alert will appear when you begin interacting with the race, such as recording starters, if there's a late entry without a start time.

Secondly, if you try to process the results and an entrant is missing a start time, the system will highlight this issue and prevent the results from being processed.

< Previous Race Return to Race List Next Race >

You have an entrant who does not have a start time, please reprocess start times before attempting to process the race results.

Finally, as requested by several clubs, we've included a timestamp indicating when the start times were last calculated to ensure an auditable trail.

Pursuit Start Times Last Processed: 22:04 09/01/2025 Visible
